

Key Vocabulary	
<b>adult</b>	A fully grown animal or plant.
<b>develop</b>	To grow and become stronger.
<b>life cycle</b>	The changes living things go through to become an adult.
<b>offspring</b>	The child of an animal.
<b>reproduce</b>	When living things make a new living thing of the same kind.
<b>young</b>	Offspring that has not reached adulthood.
<b>live young</b>	Offspring that has not hatched from an egg.

All living things **reproduce** and have **offspring**.

Some animals give birth to **live young**. Their offspring normally look like them when they are born.

Some animals lay eggs which hatch into live young. This **young** then develops into an **adult**.

When these eggs hatch, some animals look like their adult, e.g. birds and reptiles.

Other animals have offspring which do not look like them, e.g. fish and amphibians.

All young animals change at different stages as they grow into adults.

Key Vocabulary	
<b>dehydrate</b>	To lose water (dry out).
<b>diet</b>	The food and water that an animal needs.
<b>disease</b>	Illness or sickness.
<b>energy</b>	The power needed to carry out a task.
<b>exercise</b>	A physical activity to keep your body fit.
<b>germs</b>	Bugs that cause disease and illness.
<b>heart rate</b>	The number of times a heart beats in one minute.
<b>hygiene</b>	How clean something is (to stay healthy and stop disease and illness spreading).
<b>nutrition</b>	Food needed to live.
<b>pulse</b>	The beating of the heart that can be felt in your neck and wrist.

To stay alive, all animals have 3 basic needs:

To grow into a healthy adult, we must eat the right types of food in the right amount and **exercise**.

### Eatwell Guide

**oils and spreads**  
Choose unsaturated oils and use in small amounts.

Water, lower fat milk, sugar-free drinks including tea and coffee all count.

**6-8 a day**

Eat less often and in small amounts.

To stop illness and infections spreading, we must be hygienic and keep ourselves clean.
